# HOW TO USE THE AB COASTER® CTL

FEATURES AND TIPS: The Ab Coaster<sup>®</sup> CTL is designed to help you exercise your abdominal muscles via a leg lift motion. Unlike the popular ab crunch exercise, which works your ab muscles from the "top down", the Ab Coaster<sup>®</sup> moves in the opposite direction, working your abs from the "bottom up." The motion requires you to lift your knees and legs while contracting your abs.

The Ab Coaster<sup>®</sup> features a Seat attached to a swing arm to aid you in performing the abdominal lift motion. The starting position requires you to kneel on the Seat while resting your arms on the arm rests. The exercise requires you to lift the Seat using your abdominal muscles, not your upper body. The key to performing the exercise properly is to concentrate on contracting your ab muscles while lifting the Seat. Your upper body should be stable and not moving while you exercise.

Setting up the Ab Coaster<sup>®</sup>: Make sure the Ab Coaster<sup>®</sup> is placed on a flat, stable surface.

۲

• Make sure all bolts and screws are tight prior to each day's use. Make sure machine is working properly every day. WARNING: The safety level of this equipment can be maintained only if it is examined regularly for damage and wear. Pay special attention to the moving parts, including the bearings under the carriage and the pull pin which secures the carriage, and to components which are susceptible to wear

• Periodic maintenance is required on all exercise equipment in order for it to remain

• Place and use the machine on a flat, level surface. Maintain at least 2 feet of free

• Place all warnings and safety labels as provided by manufacturer on the machine if

• Train and educate members, clients or customers prior to using this machine.

### **EXERCISE INSTRUCTIONS:**

- 1. Approach the Ab Coaster<sup>®</sup> CTL from the rear of the unit.
- 2. Adjust Hand Grip and place forearms and elbows on arm pads. Grasp handles to maintain your balance.
- 3. While grasping handles, place knees on Seat so that your feet are hooked on the back edge of the seat. You are now ready to exercise.
- 4. Keeping your back straight, pull your knees forward until you fully contract your abs. DO NOT move your upper body while performing exercise. Make sure you use your abs to lift the Seat carriage, not your upper body.
- 5. Return slowly to starting position, and repeat.

Please visit www.AbCoasterClub.com and www.AbCoasterBlog.com to view video of proper exercise usage of the machine.

### ADJUSTING THE HAND GRIP

To adjust hand grip, pull up on pop-pin and move grip up or down. Then secure the grip by releasing pop-pin into the hole. Make sure hand grip is secure before using.

4

۲

# **ADJUSTING THE SEAT**

The Seat is free-moving so that you can turn your knees and work on your obliques. Turn knees to right to exercise left oblique; turn knees to left to exercise right oblique. Move knees side to side for free-style motion training.

**USING ADDED WEIGHT FOR RESISTANCE:** There is a weight post underneath the Seat of the Ab Coaster<sup>®</sup> CTL for adding weights (not included) for extra resistance during exercise.

#### **CAUTION:**

 $( \bullet )$ 

Do not add more than 40 lbs. of weight in total to the post (4 plates of 10 lbs. each). Use safety clip when adding weights (clip not included). Before adding any weight, ensure that you are able to perform the exercise with proper form without any additional weight.

# Please visit www.AbCoasterClub.com and www.AbCoasterBlog.com to view video of proper usage of the machine.

**WARNING:** As with any physical exercise routine, injuries may result from incorrect usage of equipment or excessive training.

### **MOVING AND STORING THE AB COASTER® CTL**

There are 2 wheels attached to the front leg support of the Ab Coaster<sup>®</sup> in order to aid in the moving and storage of the unit.

Keep stored in a cool, dry place. If placed in long-term storage, you should cover the unit with a cloth or other material to protect the unit from excessive dust or dirt accumulation.

### Maintenance:

Keep unit clean and free of debris. Wipe periodically with cloth to keep track clean.
